Mise en Ê uvre du cache ARP Comment rechercher les informations nécessaires pour renseigner un cache ARP ?

Contenu de ce cours.

☐ Mise en Ê uvre du cache ARP

" Recherche de ladresse Ethernet du poste de destination

Prés requis.

- □ Principes de fonctionnement des protocoles
 - " Ethernet
 - " IP

□ Encapsulation des protocoles

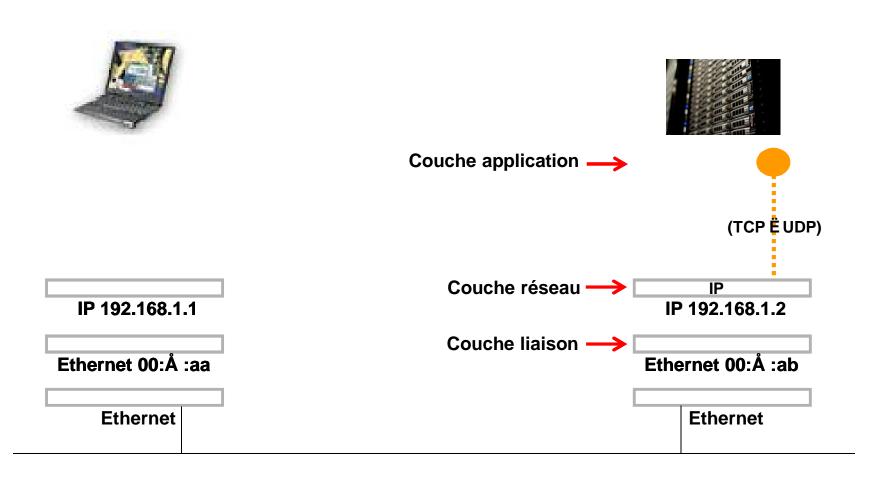

☐ Configuration des adresses du client et du serveur dapplications

☐ Attente de la pplication serveur en lien avec la couche réseau

□ Contenu initial des caches ARP

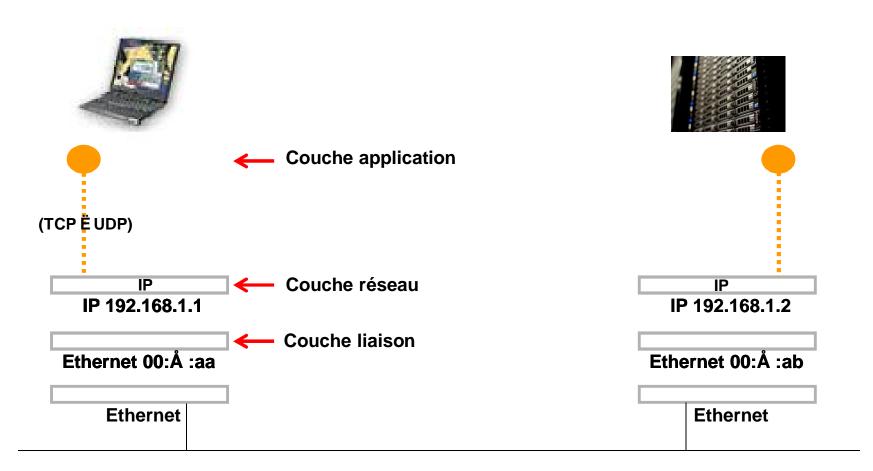

| | | Cache ARP | Cache ARP | | |
|-------------------|-----------|-----------|-----------|-------------------|----------|
| | IP | Ethernet | IP | Ethernet | |
| | | | | | |
| | IP | I | | IP | \neg |
| IP 192.168.1.1 | | • | | IP 192.168.1.2 | |
| | | | | | |
| Ethernet 00:Å :aa | | | | Ethernet 00:Å :al |) |
| F4 | thernet | | | Ethernet | |
| _ (| ıııcıııcı | | | Lillernet | |

□ Démarrage de la pplication cliente en lien avec la couche réseau

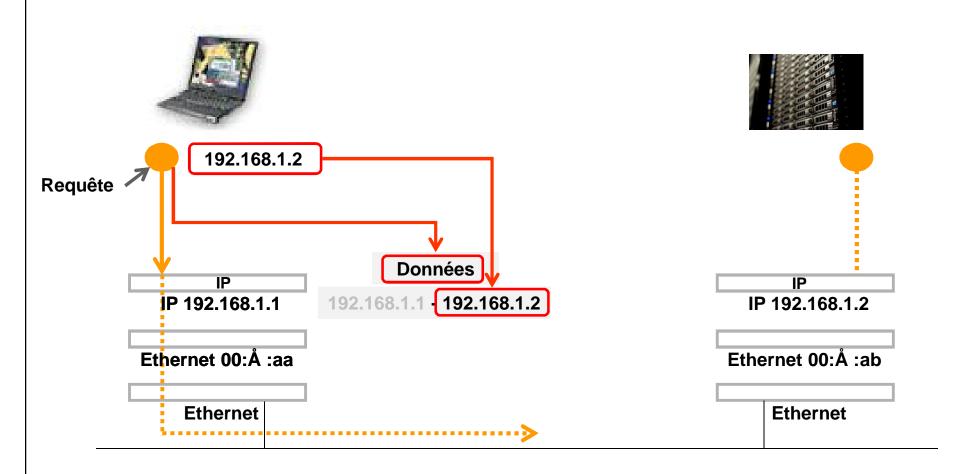

Lancement denne requête applicative du client vers le serveur

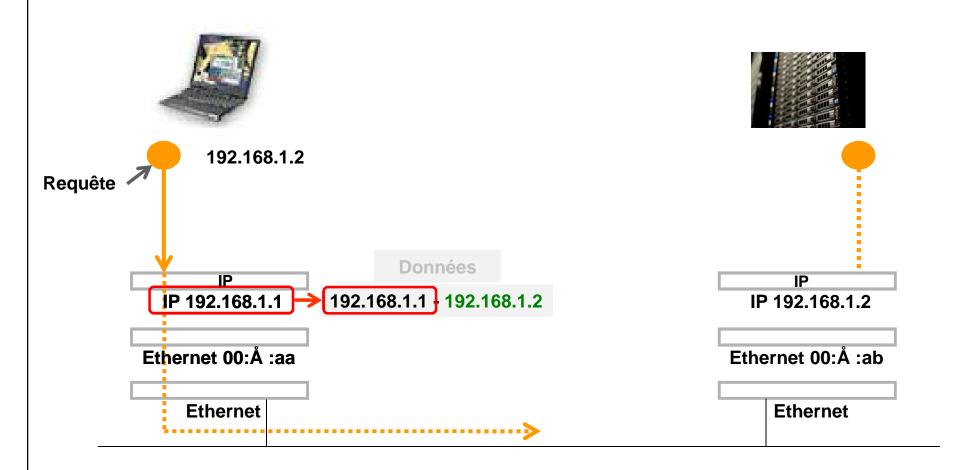

□ Construction du datagramme IP

Construction du datagramme IP

□ Construction de la trame Ethernet

□ Consultation du cache ARP afin de construire la trame Ethernet

□ Construction dune requête ARP pour interroger le serveur

☐ Construction dune requête ARP pour interroger le serveur

□ Construction dune requête ARP pour interroger le serveur

☐ Construction dune requête ARP pour interroger le serveur

Construction de la trame Ethernet pour transporter la requête ARP

Construction de la trame Ethernet pour transporter la requête ARP

Emission de la trame Ethernet contenant la requête ARP

Réception de la trame Ethernet contenant la requête ARP

☐ Réception de la requête ARP

□ Construction dune réponse pour fournir la dresse Ethernet au client

Construction de la trame Ethernet pour transporter la réponse ARP

☐ Emission de la trame Ethernet contenant la réponse ARP

Réception de la trame Ethernet contenant la réponse ARP

□ Réception de la réponse ARP

☐ Mise à jour du cache ARP du client

□ Consultation du cache ARP afin de construire la trame Ethernet

Emission de la trame Ethernet contenant le datagramme IP

Fin.
